PROFILE SUMMARY

I am a Software engineer and Data Scientist with a passion for solving complex problems and building impactful applications. I thrive in collaborative environments, where teamwork, effective communication, and leadership play a crucial role in achieving success. I look forward to contributing to innovative projects, developing cutting edge solutions and making a meaningful impact through technology.

EDUCATION

SEP 2017 - FEB 2024

UNIVERSITY OF THESSALY

- Computer Science And Telecommunications

TECHNOLOGIES

- Python
- Pandas
- Sql
- Git
- Scikit - Learn
- Docker

WORK EXPERIENCE

Military Service - IT Consultant @Armored Brigade JUN 2024 - FEB 2025

- Technical Troubleshooting and Maintenance.
- IT Infastacture Operator (Windows Server)
- Administrative Duties
- Technical Support

Freelance Web Developer 2017 - 2020

- Developed and maintained web applications.
- Built and optimized databases.
- Designed, developed, and maintained WordPress websites.
- Build RESTful APIs.

LANGUAGES

- English: Fluent
- Greek: Fluent

PROJECTS

Machine Learning App for Predicting Student Grades

- This app builds a machine learning model designed to predict a student's final grade based on various input features.

  Code (Github)

Optimizing Ensemble Learning

- This is a part of my undergraduate thesis that aimed to explore and optimize ensemble learning techniques to determine the most effective ensemble algorithm for a given dataset

  Code (Github)
